

The Campus Products StemshinePro™ was designed with the restaurant operator in mind. Five high spinning soft polishing brushes aided by a heated fan assists the operator in producing gleaming shiny stemware. Easily capable of drying and polishing six to eight times the human equivalent the Stemshine™ provides labor savings in addition to higher quality results. As many as 300 stems per hour.

The Stemshine™ is designed to function as a permanent fixture, yet is light enough to be moved around any facility on a "where needed" basis. Drawing less than 10 amps, and weighing in at 26 lbs makes the Stemshine™ completely portable. High quality polishing, fast drying, brilliant shine all equates to a positive reflection.

### CONSTRUCTION FEATURES

- \* Light weight, impact resistant, ABS717 exterior shell to withstand tough kitchen environments
- \* Solid steel sub frame on constructed base for years of use
- \* Easy access fuse assembly
- \* Durable fan motor with separate heating element for ease of replacement
